Air Transport Economics

Understand the economic mechanisms that influence decisions and performance in air transport.

Topics and objectives

- Resource scarcity and economic choices
- Airline performance indicators
- Air transport and the wider economy
- Competition, cooperation and market context
- Economic role of authorities and regulatory frameworks

What the pathway supports

- Read an indicator in context
- Connect a decision to its economic effects
- Identify areas for further study

Who is it for?

Students, new professionals and teams seeking an understanding of the aviation industry.

Our approach

1. Define needs and the starting point.
2. Build suitable learning or work activities.
3. Review progress and organise next steps.

Scope and arrangements

Knowledge-development learning. Confirm delivery arrangements and access conditions before enrolment.
