IN PREPARATION - COMING SOON

ATPL theoretical preparation

Strengthen your understanding of professional pilot theory before progressing through the separate approved training route. The preparatory programme develops technical language, numerical reasoning and the ability to connect systems, environment and flight planning.

Topics and objectives

- Air law and human performance
- Aircraft systems, powerplants and instrumentation
- Mass and balance, performance and flight planning
- Meteorology
- General and radio navigation
- Operational procedures and principles of flight
- Communications and integrated revision

What the pathway supports

- An overview of planned subjects
- A basis to discuss a suitable pathway
- Current information before enrolment

Who is it for?

Learners and professionals interested in this area; prerequisites and entry pathway to be defined.

Our approach

1. Define needs and the starting point.
2. Build suitable learning or work activities.
3. Review progress and organise next steps.

Scope and arrangements

This is a programme in preparation. It is preparatory study, not an approved ATPL theoretical knowledge course. No ATO approval, official examination recommendation or examination credit is claimed. Schedule, study load and fees will be confirmed for the intake.
